

## Topic Recommendation:

### Topics in computer vision engineering

## Course Description

Introduction to topics in computer vision engineering such as, nosql, jade, apache-kafka, deep-learning, keystone.js, mysql, java, redis, machine-learning, gpu, pandas, css, javascript, kubernetes, python, amazon-web-services, reactjs, tensorflow, computer-vision, algorithm, c++, math, impact key dairy product attributes .- develops dairy product specifications, teamequal employment opportunityticketmaster strongly supports equal employment opportunity, identifies key attribute ranges within process capability, current challenges include using geographic information services, c ++, pythonstrong machine learning background inclusive

## Course Learning Outcomes:

require employment eligibility verification document form upon hire  
optimize new product performance .- maintains technical documentation  
meet food cost targets .- assists teams  
include language use restrictions ), citizenship  
boost opportunities like tuition reimbursement  
interest technical challenges every day  
move mature machine learning research  
hire practices the preceding job description  
distribute computing preferred qualifications experience  
enrich lives one amazing experience  
paramount .- experience teaching  
lead transportation tech company  
scale new menu items  
groom practices ), family  
skilled machine learning engineer  
solve make us one  
bring positively disruptive technology  
develop robot learning algorithms  
help us solve  
please apply today  
uncover new opportunities  
doing using machine learning  
improve dairy products  
please apply directly  
learn new technologies  
consider qualified applicants  
demonstrate ability building  
include religious dress  
enable new levels  
excite sw tools  
identify trues fans  
need different approaches  
personalize user perception  
target development sessions  
build incredible technology  
protect veteran status  
tackle complex  
include medical  
provide machine  
develop technology  
learn insights  
distribute near

include promotion  
include cancer  
scale formulations  
develop prototypes  
include pregnancy  
classificationdeveloping sw  
relate degreewhat  
sell tickets  
save parent  
rank contributors  
provide recommendations  
personalize platform  
match 401k  
help millions  
get tickets  
fledge commercial  
exceed even  
enjoy work  
detect abusive  
focus team  
work wherever  
look forward  
receive feedback  
pace excitement

### **Summary from top job descriptions:**

We scale.Top Reasons to Work with Us- Get out of West LA Traffic - WE ARE IN DOWNTOWN LOS ANGELES & close to the metro- Our technology: we have significant scale & offer challenges which require the best of the best engineers.- Great compensation package (salary, full benefits, equity)What You Will Be DoingYou are an expert Ruby on Rails developer with expertise in well architected code.

We are building a team of creative problem-solvers from many different backgrounds.What You Need for this Position- 4+ yrs experience in Ruby on Rails or a comparable object-oriented programming language building RESTful APIs.

You understand that the software you build affects other teams and other parts of the stack, and take full ownership of what you build from development to production to its effects on the user.- BSCS or Related DegreeSo if you are a Senior Ruby on Rails Developer who has a passion for saving parent's time...APPLY TODAY!Applicants must be authorized to work in the U.S.Please apply directly to by clicking 'Click Here to Apply' with your Word resume!Looking forward to receiving your resume and going over the position in more detail with you.- Not a fit for this position?

This is an opportunity to bring your desire to build incredible technology, invent stuff, and build it quickly in an entrepreneurial startup environment that aims to disrupt a Bureaucratic dinosaur of an industry.

We have brand new beautiful offices and massive R&D; warehouse space in a great, central location in Orange CountyThis is an opportunity to bring your desire to build incredible technology, invent stuff, and build it quickly in an entrepreneurial startup environment that aims to disrupt a Bureaucratic dinosaur of an industry.

Minimum Required Skills:Computer Vision, Sensor Fusion, LIDAR systems, Radar Systems, Machine Learning, Object Tracking, Object Detection, Object Recognition, Algorithm Development, C++We are hyper-funded in only our seed round, with the financial support of the biggest individuals in the tech world.

We have brand new beautiful offices and massive R&D; warehouse space in a great, central location in Orange County!This is an opportunity to bring your desire to build incredible technology, invent stuff, and build it quickly in an entrepreneurial startup environment that aims to disrupt a Bureaucratic dinosaur of an industry.

We build stuff on our dime, not the government dime, and rather than build it slowly with government funds, we build it rapidly as in a startup, with our funds, and then sell it to the government much cheaper, safer, quicker, and better by far than the ancient fatcats who have until now owned this industry!Above all, our goal is to make the country better, wealthier and SAFER by disrupting this old

model and bringing the startup mentality to this space. **What You Will Be Doing** We are working on challenges in Computer Vision which can be applied to various uses including autonomous vehicle control (land and air!), robotics, artificially intelligent surveillance, object detection/recognition/tracking, LIDAR and RADAR systems, big data analysis, Machine Learning, etc. You'll be working wherever your expertise fits in.

**Minimum Required Skills:** Computer Vision, Robotic Systems, User Modeling, ML / DL Solutions, Tensorflow, Caffe, Keras, Torch, Robotics, Data Science If you are a Senior Software Engineer with Machine Learning experience, please read on! Located in Pasadena - We are working to create groundbreaking products and services that impact people's quality of life in meaningful ways. This person will need 5+ years of experience with Machine Learning. **What You Will Be Doing**- Design and develop robot learning algorithms that enable advanced social human-robot interaction- Lead machine learning research and analysis of human-robot interaction data towards an autonomous and personalized platform- Work on other advanced robot control, behavior, and interaction problems as needed- Work collaboratively with:- Domain experts to implement robot features and behaviors specific to end-users' needs- Creative team of writers and animators to use perception to create engaging robot content- HRI experts to improve and personalize user perception- Firmware and software engineers to implement algorithms and drivers **What You Need for this Position**- 5+ years developing complex statistical ML methods for computer vision, robotic systems and/or user modeling- Experience developing ML and DL solutions using tools such as TensorFlow, Caffe, Keras, Torch or equivalent- MS/PhD in CS, CE, or Robotics with focus on ML or data science **What's In It for You** We are prepared to offer a great base salary up to \$185k depending on experience plus options and other great benefits! So, if you are a Senior Software Engineer with Machine Learning experience, please apply today! Applicants must be authorized to work in the U.S. Please apply directly to by clicking 'Click Here to Apply' with your Word resume! Looking forward to receiving your resume and going over the position in more detail with you.- Not a fit for this position?

One of our missions is to bridge the gap between the fan and the artist. **Responsibilities:** In this role you will: Be part of a dynamic,

highly-focused team that is responsible for providing machine-learning insights and SW products that engage TicketMaster's 170+MM users  
 Be collecting and analyzing very large data sets  
 Carry out tasks encompassing data cleansing and data normalization  
 Designing and implementing machine learning algorithms ranging from feature engineering, feature selection, clustering, predictive scoring and classification  
 Developing SW to prototype new algorithms for identifying true fans, detecting abusive/nefarious entities, user segmentation, user interest discovery, performance optimization and user response prediction as part of a massively parallel and distributed near-real time collaborative filtering system/marketing platform  
 Be directly involved in the productization of your algorithms and ideas into full-fledged commercial-grade SW tools that will directly interact with, and affect the experience of million of users, both domestically and internationally  
 Participate in peer code reviews, write unit tests and provide feedback to other members of the team  
 Carry out rigorous model validation and model tuning/optimization as part of the natural model life-cycle  
 Qualifications:  
 4+ years of strong software engineering with a high-level programming language such as Java, C/C++, Python  
 Strong machine learning background inclusive of supervised and unsupervised algorithms  
 4+ years of industry experience building scalable solutions to real-world data problems, or equivalent and pertinent course work  
 Proficient in SQL and RDBMS's  
 Experience with unit testing frameworks like JUnit, Mockito or similar  
 Experience with/knowledge of frameworks like Hadoop, Spark and similar data platforms  
 Education: BS/MS/Ph.D. In CS, Math or Physics  
 Effective communication skills and enjoying work as part of a team  
 Equal Employment Opportunity  
 Ticketmaster strongly supports equal employment opportunity for all applicants regardless of age (40 and over), ancestry, color, religious creed (including religious dress and grooming practices), family and medical care leave or the denial of family and medical care leave, mental or physical disability (including HIV and AIDS), marital status, domestic partner status, medical condition (including cancer and genetic characteristics), genetic information, military and veteran status, political affiliation, national origin (including language use restrictions), citizenship, race, sex (including pregnancy, childbirth, breastfeeding and medical conditions related to pregnancy, childbirth or breastfeeding), gender, gender identity, and gender expression, sexual orientation, or any other basis protected by applicable federal, state or local law, rule, ordinance or regulation.

Minimum Required Skills: Dairy Science, Food Science, Dairy formulation, Quality Assurance, Scaling formulations, Dairy Processing, Dairy Manufacturing, Culinary, culinary development  
 If you are a Food Scientist with experience, please read on!  
 What You Will Be Doing- Assists Technical Teams in formulating and scaling new menu items- Supports development of safe, consistent dairy products/improvements that fulfill concept requirements, nutrition guidelines, are operationally --feasible and meet food cost targets.- Assists teams with commercialization- Designs testing protocols for validation of new dairy products and new equipment. for dairy products- Provides recommendations on ingredient functionality to optimize new product performance.- Maintains technical documentation on all activities.- Assist in guidance and development of projects as needed  
 What You Need for this Position  
 More Than 5 Years of experience and knowledge of:- Dairy Science- Food Science- Dairy formulation- Quality Assurance- Scaling formulations- Dairy Processing- Dairy Manufacturing- Culinary- culinary development  
 So, if you are a Food Scientist with experience, please apply today!  
 Applicants must be authorized to work in the U.S.  
 Please apply directly to by clicking 'Click Here to Apply' with your Word resume!

Minimum Required Skills: IOT, Brain Science, class 3 medical devices  
 Are you a Director of Software Engineering with demonstrated

ability building a team from scratch in the biotech space?

We are developing the first of its kind device and we have over 90M in the bank to back our dream. Top Reasons to Work with Us- Be on the ground floor of a significantly funded startup- Build the team who will be responsible for the world's first neuroprosthesis device of its kind!- Improve humankind: be responsible for repairing and improving the brain What You Will Be Doing Build and lead a multidisciplinary team to create the algorithms and neural interface for the world's first neuroprosthesis for cognitive repair and improvement in the hippocampus. What You Need for this Position- IOT experience- Class 3 Medical Device Experience- Extensive experience running a software team- BSCS or Related Degree What's In It for You- Health, dental, and vision- Generous vacation policy- Matching 401k- Monthly contributions to student loan debt- Company paid life insurance and short term disability So if you are a Director of Software Engineering with demonstrated ability building a team from scratch in the biotech space...APPLY TODAY! Applicants must be authorized to work in the U.S. Please apply directly to by clicking 'Click Here to Apply' with your Word resume! Looking forward to receiving your resume and going over the position in more detail with you.- Not a fit for this position? Our ideal team member will be highly skilled (Masters or PhD) and able to utilize Machine Learning and NLP to create machine translation solutions for our proprietary algorithms and will also be excited about working in a fast-paced, open-table, multi-discipline environment. What You Will Be Doing Using Machine Learning and automatic speech recognition/NLP systems to create cutting edge Machine Translation solutions. What You Need for this Position- 5+ Years of Work Experience - PhD or M.Sc. in CS, EE, or Physics - C++/C#- Data-Driven Statistical/Machine Learning methods- Natural Language Processing (NLP) Nice to Have:- Big Data/Data Science- Familiarity with Linguistic Phonetics- Basic Digital Signal Processing Techniques for Audio- Continuous Integration- Proficient in JavaScript/Unity3D/Mobile Development (Android and/or iOS) So, if you are a highly talented Machine Learning Engineer that is interested in contributing to the future of AI for VR social interaction (basically a ninja), please apply today! Applicants must be authorized to work in the U.S. Please apply directly to by clicking 'Click Here to Apply' with your Word resume! Looking forward to receiving your resume and going over the position in more detail with you.- Not a fit for this position? Minimum Required Skills: C++/C#, Machine Learning/Artificial Intelligence, Natural Language Processing (NLP), Big Data, Data Science, Continuous Integration, JavaScript, Unity3d, Android, iOS If you are a Skilled Machine Learning Engineer that is ready to help shape the future of VR identities/profiles, please read on!!! Based in prime location of Pasadena, CA, we are well funded, venture backed start-up that working it in the cutting edge space of AI and VR.
